

SO FAR

*Music and lyrics by Jacen Duncan,
Diego Las Heras and Cèlia Pallí*

Yes, I've been walking
'Round and 'round
Thinking that this is it
That this is it, that's all it is
Just one step at a time
Life is what comes to you
That's all I knew, all I knew
But again
I saw your face
To realize what it's all about
I feel awake
Nothing to fear
There is no way back

I would spend ten billion years
Floating to you
Time has travelled to the edge
And you're still here
I've fallen for you

If I look into your eyes
I can see the space between
Galaxies and what we are
How did we ever come so far?
We are getting lost in the light
Searching for etheric night
We're moving fast
Through timeless life
How did we ever come so far?

Another day, another night
I say let's do it right
The two of us
Just you and I
I understand what I must do
To get close to you
'Cause I live for you, just for you
But again
I see your face
And realize what it's all about
I feel awake
Nothing to fear

There is no way back

I would spend ten billion years
Floating to you
Time has travelled to the edge
And you're still here
I've fallen for you

If I look into your eyes
I can see the space between
Galaxies and what we are.
How did we ever come so far?
We are getting lost in the light
Searching for etheric night
We are moving fast
Through timeless life
How did we ever come so far?

We will survive
We will survive the void in us
We will survive
We will survive the void in us

If I look into your eyes
I can see the space between
Galaxies and what we are
How did we ever come so far?
We are getting lost in the light
Searching for etheric night
We are moving fast
Through timeless life
How did we ever come so far?
How did we ever come so far?
How did we ever come so far?
How did we ever come so far?
How did we ever come so far?
